

Trash-Talk

What is Trash-Talk?

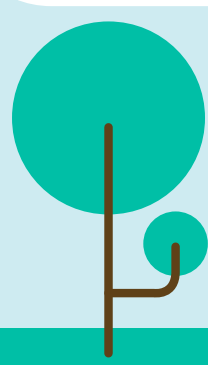

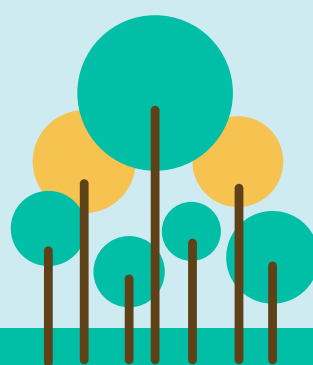

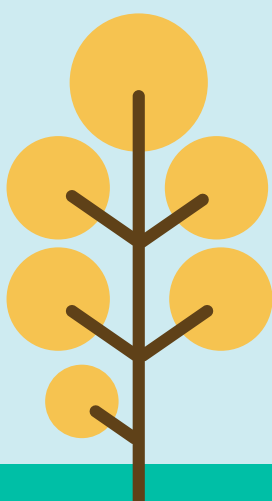

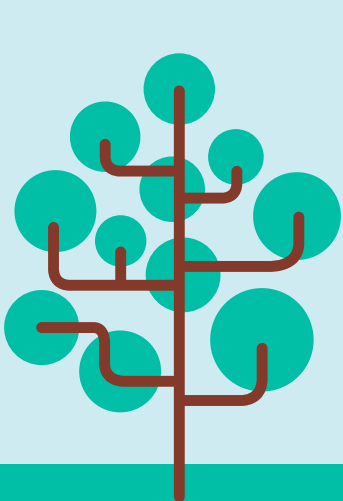

Trash Talk is a student led campaign with a planned set of activities carried out by students over a period of time to objectively achieve a plastic free campus. The aim of the campaign is to reduce and eventually eradicate single use plastic from school. By embracing a plastic free culture into school, we hope to embed this culture into each student's moral code, cultivating a wave of positive change for our environment. It is our hope the students will continue with this behaviour when they leave school, turning the tide eternally, on our reliance on plastic. This is an act local impact global campaign.

Download
the **Trash
Talk**
application

Form a team
within the
school that
will decide
to lead the
way

Educate yourself
and others
about the
cause's effects
and solutions to
plastic pollution

Rally support
from all types of
stakeholders on
your campus

Meet with your principal and ask for **support** with this

Make a plan of action and follow the app and Toolkit for advice

What Trash-Talk can offer you?

- Quiz to check your environmental knowledge
- The latest environmental news (Local and International)
- Knowledge to make your school greener
- Become part of environmental activist
